## **DETAILED ACTION**

### ***Status of the Application***

This Office Action is in response to applicant's arguments filed on 12/6/2004. Claims 1-17, 19, 38, 54-61 have been cancelled. Claims 18, 20, 35, 39 have been amended. Claims 18, 20-37, 39-53 are pending and are examined herein.

### ***Response to Arguments***

In light of applicant's arguments and amendments, both the U.S.C. 112 and 102(b) rejections have been withdrawn.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham vs John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1617

Claims 18, 20-37, 39-53 are rejected under 35 U.S.C. 103(a) as being obvious over Bolt et al. (EP 396,335) in view of Harrison et al. (US Patent 6,086,909).

The instant claims are directed to a pharmaceutical composition containing celecoxib and a dispersion-enhancing amount of an effervescent agent.

Bolt et al. teach a tablet comprising a medicament and an effervescent couple (pg. 7, line 32), where the medicament is selected from non-steroidal anti-inflammatory drugs (pg. 2, lines 40-44). Citric acid and calcium carbonate are specified (pg. 3, lines 3-5). The ratio of acid to base is disclosed to be 4:3 to 1:3 (pg. 3, lines 7-10). A 250 mg. tablet is specified with acid (0.5-20%) and base (0.5-30%) content (pg. 3, lines 17-20).

However, Bolt et al. fail to disclose the specific non-steroidal anti-inflammatory drug celecoxib.

Harrison et al. teach that celecoxib is a non-steroidal anti-inflammatory drug (col. 7, lines 40-42).

It would have been prima facie obvious to a person of ordinary skill in the art, at the time the claimed invention was made, to use celecoxib as the non-steroidal anti-inflammatory drug in the composition taught by Bolt et al.

A person of ordinary skill in the art would have been motivated to include celecoxib because of the reasonable expectation of successfully producing an effective pharmaceutical composition.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1617

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
